By the way: PureBeats is
only available on the
Megabrain Suite.

PureBeats are Neurostreams™ without music!

The Megabrain Suite includes 3 PureBeat sessions - one version for each:

- **IQ 7000, Cognition Ammunition and HyperbrainPower**

These Neurostreams™ consist only of the pure beats - without background music.

They are exactly the same beats and frequencies (and instructions for use concerning eyes and ears) as given in the descriptions for these 3 tracks - each adapted to 45 minutes in length.

Relaxing breaks are slightly longer, as are the phases of tension. They therefore
train you a little harder.

They are also suitable if you don't want to listen to music at the moment, for example. You can also
listen to them endlessly "non-stop" one after the other - or mix them with other audio.

Because there is no background music, there is only one version of each of these 3 programs - you
can only hear the skeleton, so to speak.

They may sound a bit raw and technical, but from a functional point of view they are top. Please don't
let this put you off. After a while you won't hear it anymore, you'll get used to it.
